J. C. Aven. Dear Sin,—My little son, four yoars old bus just recovered from a severe attack of malignant Scarlet Feever, his throat was rotten, and every person that visited him, pronounced him a deaf child. Raving used your Cherry Perroact in California, in the winter of 1850, for a severe attack of Bronchitis, with entire success, I was induced to try it on my little boy. I gave him a tea-spoon-full every three hours, commencing in the morning, and by ten o'clock at night. I found a decided change for the better, and after three days use, ho was able to cat or drink without pain.

Its use in the above named disease will save many a child from a premeture grave, and refleve the anxlety of many a fond parent. For all infections of the Throat and Lungs, I believe it the best medicine extant. A feeling of the accepts gravitude, prompts me in addressing you these lines,—but for your important discovery, my lit to be, would now have been in autother world.

I am yours, with great respect,

J. D. POWELL, Supt. Trans., L. R. R.

Rock Hill, (Summerset Co., N. J., July 21, 1252.

Jan. J. C. Ayen.—Since your medicine has been known here, it has a greater demand than any other cough remedy we have eversold. It is spoken of in terms of unmeasured praise by those who have used it, and it know of some case, where the boat they can say of it, is not too much for the good it has done. I take pleasure in aelling it, because I know that I nm giving my ensitomers the worth of their money, and if feel gratified in seeing the benefit it confers.

Pleaso send me nfurther supply, and beliavo me Vours, with respect, John C. WillTLOCK.

P. S. Almost any number of certificates can be sent you, if you wish it.

Mr. S. spoke against the bill.
Mr. CAVAN also opposed the bill.
On motion of Mr. MATTHEWSON, the bill and amendment were then referred to the committee on the Judiciary.

REPORTS FROM STANDING COMMITTEES. Mr. BULLOCK, from the committee on the Judiciary, reported a bill from the H. R. reserving power to repeal charters and other laws: pass-

Also—a hill from the H. R. to increase the fees which was appropriately referred, viz:
Mr. SMEDLEY—a hill for the benefit of Philof jailers: passed.
Also—a bill from the H. R., repealing the law

extending the powers of the municipal authorities of the town of Lawrenechurg, with the opin ion that it ought not to pass: rejected.

Also—a hill from the H. R. for the benefit of Richard Taylor and his adopted daughter, Mary

Richard Taylor: passed. Also—a bill to incorporate the Board of Trus tees of the Kentucky Fornale College: passed.

Also—a bill to increase the power and juris diction of the Mayor of Newport; passed.
Also—a bill to incorporate Mount Eden Lodge, No. 263, of Free and Accepted Masons,

in Spencer county.

A discussion ensued as to the propriety of passing such bills as this, which were believed to be provided for by the general law.] Before the vote was taken, the hour arrived for

ORDERS OF THE DAL.

Mr. WADSWORTH moved that the consideration of the resolutions relating to the repeal of the Missouri Compromise, &c., be postponed until 3 o'clock this evening: motion earried.

The bill to establish the Kentucky Institution for the Education of Idiotic and Imbecile Children, heretofore reported by Mr. D. HOWARD SMITH, from a select committee, came up as a

support of the bill.

Mr. SUDDUTH moved to commit the bill to bill. The committee on Education, with instructions to ; inquire whether the object might not be best attained by establishing a professorship at each of "The real and

tained by establishing a professorship at each of our Lunatic Asylums, for the instruction of idiots and lunatics, and as a substitute for the present form of government of those institutions.

Mr. WADSWORTH opposed the motion to commit.

Mr. BULLOCK supported the motion. The motion to commit, with instructions, was

then carried. A communication from the State Medical Society, now in session in Frankfort, was received,

And then the Senate took a recess until three tive-yeas, 30; nays, 55.

EVENING SESSION.

The Senate resumed the consideration of the resolutions in relation to the repeal of the Missonri Compromise, &c., heretofore proposed by Mr. BARLOW—the question being upon the adoption of the substitute reported by Mr. CONKLIN, from the committee on Federal Re-

Mr. WEIS spoke in opposition to the substi-tute, and in favor of the original resolutions.

Mr WADSWORTH theu spoke at some length in favor of the substitute, and in reply to arguments which had been urged against it.

On motion of Mr. McFARLAND, it was then ordered that the vote upon the resolutions and substitute be taken to-morrow at 12 o'clock.

And then the Senate adjourned.

HOUSE OF REPRESENTATIVES. WEDNESDAY, Feb. 6, 1856.

Prayer by the Rev. James M. Lancaster, of the Catholie Church. The Journal of yesterday was read.

MESSAGE FROM THE SENATE.

A message was received from the Senate, announcing that they had passed a hill which originated in this House, entitled, an act to amend the charter of the Louisville and Frankfort Rail-

roud Company, with an amendment.
That they had passed a bill, entitled, an act to divide the State into thirteen Judicial Districts. PETITIONS.

veas, 46; navs, 37. And then the House adjourned. The following interesting communication

is from the pen of Dr. Sroom, of Troy, New York, one of the committee of the National Medical Society, upon the subject of hydrophobia, and now on a visit to the Kentneky State Medical Society, in session in Frankfort:

For the Commonwealth A few days since we noticed, under the head of legislative proceedings, the introduction of a bill to foster and protect the interest of sheep linsbandry in Kentucky, by diminishing the number and restraining the liberty of dogs. To prevent the ravages of these predatory animals among sheep, such a law is much needed; but there is another and paramount reason, aside from the pecuniary interest of the wool-grower, why such a law should be enacted. It is well known that dogs are so peculiarly liable to hydrophobia, that the disease has, from the earliest ages, been sup-posed to have originated in that animal; and for that reason was called "canine madness;" that the bite of a "mad dog" in many cases produces the same horrid disease in man, as well as in sheep, swine, and other animals; and that the disease (with care und doubtful exceptions) has hitherto never been cured. In proportion, therefore, to the inealculable value of human life, compared with that of the brute, does the enactment of the proposed law become necessary.-The importance of this subject has lately attracted the attention it so much deserves, from the medical profession; and a committee of the Amer iean Medical Association have now in course of preparation a report, to be presented at the next meeting of that body, which will exhibit a mass of facts and statistics that should convince all o the necessity of legislation on this subject, not only for the protection of sheep in the rural districts, but what is immeasurably more important, for the protection of human life, in cities as well as in the country.

Without intending to anticipate the forthcom ing report, it may be confidently asserted that it will lead to the following conclusions:

1st. That hydrophobia is not indigenous or pe culiar to any country, climate, or season of the year, although (contrary to popular opinion) it ocears most frequently in cold countries, or dur ing autuum, winter, and spring, in temperate re gions. It prevails most in the northern countries of Europe, and in the northern States of this Union, while it is unknown in Syria, Egypt, and other tropical countries. There was not a single case in the Island of Januaica for a period of fifty years, and then it was introduced by dogs from the United States.

2d. That the disease in man is always produced (and generally in brutes) by the bite of a dog, or other animal.

3d. That no age or sex is exempt from the dis

ease, when exposed to its cause. 4th. That the bite of a ferocious dog, inforia ted to madness by any sudden provocation, may produce hydrophobia, even if the animal at the time of the lite is in health.

5th. That the danger of hydrophobia is in proportion to the number of clogs in a community, and hence it is fair to conclude that hydrophohis would cause on the extinction of the canine

STRAW-CUTTER QUESTION.

Min the State of Indiana, claiming to he the owners of Sandford's paten-right to manufacture what Is known as Sandford's Paten-right to manufacture what Is known as Sandford's Paten-right to manufacture what Is known as Sandford's Niraw-Catter, have sold the right to munafacture the saote to various persons for certain prescribed territories, and they have warned the public against purchasing the Straw-Cutter manufactured by as. We have been for a long time satisfied that the so-called-Sanoford patent is a fraud, and that it is void, being a palpable piracy and infringement of the patent-right of John Boynton, which bears date 25th day of September, 1638, and has expired. We have been satisfied that the machine de nominated Sanoford's perfect Straw-Cutter is constructed not according to the specifications contained in Sandford's patent, but according to the specifications contained in Boynton's and all this has recently heen decided in the U.S. Circuit Court for the Middle district of Tennessee Some months since, wo sold to B. S. Weller, of Nash ville, several of the so-called Sanford Straw-Cutters which were taken by him to the State of Tennessee and there sold. Ch's M. Alexander claimed to be the assigner of Sanford's patent for the State of Tennessee from J. B. Ford & U., and sucd Weller on infringement. Weller defended and insisted that Sanford's patent is void and a piracy on Boynton's, and, as we betore said, court and jury so decided.

We are prepared, as heretotore, to turnish all orders for the Straw-Unters manufactured by wears. STRAW-CUTTER QUESTION. and Jury so decided.
We are propared, as heretotore, to turnish all orders, for the Straw-Uniters manufactured by ns, and to defend any and every person in selling or a sing them.

ORDER. Waller v Bodley, Payette-way aroued.

pated from its further prosecution

As the Geological Report for 1551 and 1855, cannot appear before the adjournment of the Legislature, I have been requested to prepare a sy nopsis of some of the principal results of the ge ological survey up to the present time, to see forth the objects to be obtained by its further pro secution, and lay before the members of the Le gislature some of the advantages which the Com onwealth of Kentucky must derive from de veloping its mineral resources, and publishing these to the world in the in the reports of the geological survey.

A reconnoisance has been made of sixty-three

counties, embracing those of the Jackson Pur-chase; most of the counties lying between Green of the State; the south-eastern mountain coun Ohio river below its falls; also the counties of Greenup, Lawrence, Carter, and Lewis.
One county of 500 square miles has been sur

eyed in detail, and a complete geologieo-topo graphical map prepared of the same on a large scale of 3.8 to the mile; which was afterwards educed to a scale of 1.27 to the mile, or 1.50,000 is the original map would have been inconveni

ently large, and too expensive for publication The diminutive existing county maps, and the talse state of the geography of the country which they profess to represent, renders it absolutely necessary to prepare accurate maps of the counties on a sufficiently large scale before the geolog cal features can be located

The detailed geologico-topographical survey of Union county has developed, beyund all anticipa tion, the mineral resources of that county. he lower 1,000 feet of the coal measures of Inion county, nine to ten workable beds of c have been discovered; the thickness of which is over thirty feet, and capable of yielding under each acre of ground, over 1,000,000 bushels of coal, after throwing off an ample allowance for waste and slack; worth more than \$-0,000, if all worked out; which, after deducting the expenses mining and transportation to market, will rield a clear profit of \$30,000.

Besides this, there are valuable beds of irontones associated with the coal, which, at a low estimate, will produce from every acre when smelted, 1,350 tons, worth, at the lowest price,

timits two rich coal fields, occupying more than one-fourth the area of the State, with a depth of 25,000 to 35,000 feet, embracing at least eighteen workable beds; while the coal measures of thom discourses are received by the coal measures of the coal measure Missouri, as reported by the geological survey of that State, are only 650 feet in thickness on the Missouri river, embracing two workable beds, as presented in the scetions of the coal measures embraced in the report on that State just issued. The lower 1,000 feet of the coal measures, over very great area, will undoubtedly afford in many sections of the State, valuable bed, of ironstones which can be converted into iron at great

I'p to the present time, the operations of the geological corps have been chiefly directed to develope the mineral resources of the State in coal and iron ore, as these are considered of the first

A few facts in regard to the consumption, cost production, and demand for iron, together with the profits that can be derived from its manufacory, will serve to exhibit the value of the raw material, and where it is situated so us to be mined with facility, and produce iron at a cheap

The consumption of from in the Un-States for 1853, was Production.

Freight,

This would take out of the country \$36,500, 000 per annum for an article which the United States, and especially the Western States have the this raw material into articles of commerce, \$50 per ton at a profit of 30 to 10 per cent.

Dr. Wilson, of the British commission to the New York exhibition, on the iron industry of the United States, stated, in a paper read before the Society of Arts in London, that Creek Priville and the London their union the Society of Arts in London, that Creek Priville and the London their union the Society of Arts in London, that Creek Priville and the London the Creek Priville and the London their union the coal measures that comming their union the coal measures that comming the coal measures that comming the coal measures that comming the the Society of Arts in London, that Great Britain could not hold possession of the market for iron in this country, unless she could deliver piging at \$20, and bar iron at \$50 per ton. While it is known that when the price of railroad iron falls in Great Britain to \$30 per ton, the mast of the manufactories stop until the price raises: this is equivalent to from \$50 to \$55 delivered in this country after freight, duty commission, discount, themselves over which it has sourced and to correct themselves over which it has sourced and to correct themselves over which it has sourced and to correct themselves over which it has sourced and to correct themselves over which it has sourced and to a correct themselves over which it has sourced and to a correct themselves over which it has sourced and to a correct themselves over which it has sourced and to a correct themselves over which it has sourced and to a correct themselves over which it has sourced and to a correct themselves over which it has sourced and to a correct themselves over which it has sourced and to a correct themselves over which it has sourced and to a correct themselves over which it has sourced and to a correct themselves over which it has sourced and to a correct themselves over which it has so a correct themselves over the country of the mast of the coal region is derived more from the finely continued.

commission and carriage for a distance of 300 his railroad iron at a profit of 15 to 26 per cent and still undersell the lowest price at whic lowest price at which

the United States, the increased demand in the iron in the United States, at the present rate of 740,000 tons to be imported; if the rate of production in the United States be not increased. Do not these facts clearly demonstrate

1. That the increased production of iron in this That this business offers for the investment

f eapital the most certain and ample profits.

3. That the production of iron cannot be over one; while the amount manufactured in this country falls so far short of the actual consump

Juy, of each year, and if accounts are not paid at those ing railroad iron, and superior in quality to that times, interest will be sharged until they are paid, imported, since it is to be expected that foreign countries retain their best iron for home consump-

made into rails; as this is the kind of iron mustly produced, at present, in our country, very little railroad iron is, as yet, made in this country; but the time is now at hand when establishments for the production of railroad iron must be erected in A certain and speedy cure for Ague and Fever, and the United States.

Pinkertou's Ague Pills, the production of railroad iron must be erected in A certain and speedy cure for Ague and Fever, and the United States.

question then arises, where will these

how it is the duty of every state to ascertain her is hippy effect resources in iron and coal, and publish to the world the localities where these raw materials oct. 21 -tf. can be obtained in connection. That State which fails to disclose their early de, elopment, not only neglects a national duty, but will loose the advantages to be derived from calling the attention the

of capitalists to their mineral resources; and will permit the wealth which must inevitably flow from the introduction of so important and lucrative a trade, to be directed to other chan nels. But it is not the iron trade alone which is destined to cluster around these deposites of min eral wealth; manufactures of every description will necessarily be located where it ran limit the cheapest fuel-one of the great sources of me chanical power. The experience of all nationproves, that the real wealth and power derived from such sources by lostering industry, and in stilling into its population habits of application and frugality, and giving encouragement to every species of mechanical invention and scientific discoveries, is the foundation of all national greatness; for those nations who have rapidly ac umulated wealth by the discovery of mines of precious metals, have invariably quired habits of extravaganee, recklessness and orruption, little calculated to lead 10 permanent national advancement. Witness Spain and Mex-Just as the youth who falls heir to large possessions is too apt to fritter away his fortune in dissipation and idleness, and permit his ener gies to lie dormant for lack of motive to arouse

Though I have confined the foregoing remarks mainly to coal and iron, they apply equally to the lead and zine ores disseminated in the limestone underlaying and encireling our coal fields, and to the materials required for the use of the potter, that may be derived from several of the geolog

ical formations of the State The reconnoisance of Greenup and Parter counties has disclosed, in 740 feet of the lower eoal measures, fourteen distinct beds of excel lent iron are, varying from four inches to four or live feet in thickness, associated with coals of sqperior quality; and there is reason to believe that in the belt of the same formation stretching thence in a southward course across the entir State, abundance of iron ore and coal will be discovered in prosecuting a detailed geological survey of the mountain counties, since, at var localities along its southwestern confines in Pulaski county and elsewhere, important deposites of these minerals present themselves.

The base of both the castern and western coalfields are reservoirs of productive brines wherever they form spredict folds.

ever they form syuclinal folds or troughs or abut on impervious faults of the adjacent limestones such as are worked with profit on Goose creek, in Clay county, and at Brashear's salt well, on the north fork of the Kentucky river.

smelted, 1,350 tons, worth, at the lowest price, over \$25,000. The eastern coal-field, occupying the mountain Is it, then, to be wondered at that lands now country, the superficial drainage than the western. It is a prolongation of the pennsylvania coal measures, which includes the country watered by the Big Sandy; the Kentucky river above its forks; the heads of the Lieking, kentucky is the only State that has within its and the Cumberland river above its shoals; embracing some twenty-four of the mountain counties. The coals of this coal-field are, for the inost part, of excellent quality; rich in fixed car-bon The main coals which have been analyzed from Big Sandy, the forks of the Kentucky river, and the shoals of the Cumberland river yielding from 58 to 63 per cent of fixed carbon, while they are free from earthly impurities

In Greenup and Carter counties, from six to eight distinct bed of iron ore exist, sometimes in the same hill, with un average united thickness of six to eight feet; capable, therefore, of sup ply, under each acre, when mined and smelted, 8,000 tous of iron, worth \$209,000. hills contain at least beds of good workable coa which may be safely estimated to have a united thickness of six feet of solid coal; which wil afford in addition, over the same tracts, 10,000 tons per acre, worth, at a low estimate, \$20,000 after throwing off an ample allowance for waste nud slack.

The upper coal measure of the eastern coal field in the counties of Lawrence, Johnson, Floyd, Harlan, and Knox embrace very thick beds of coal containing 60 to 63 per cent. of fixed earbon, with a very small ash lying from fifty to two hundred feet above the superficial drain age. In Lawrence, Johnson, and Floyd, these crop out in the hills bordering on Big Sandy, and therefore easily accessible and convenient for transportation to market.

Pine workuble coals containing 60 to 62 per

342 00 cent of fixed earhan lie under the conglomerate tin some of the mountain counties, as, for instance, in Pulaski county, above the shoals of the Cumberland river, conveniently situated for transportation down that river.

These few illustrations will suffice to demonst

means of producing at one-half the cost, and which next to the products of agriculture, are the which the manufacturer could afford to sell at most essential to civilized man, but which, with out that active capital, must lie comparatively

Society of Arts in London, that Great Britain al wealth, is for the most part an unproductive ountry after freight, duty cammission, discount themselves over which it has spread, and to a cer on bond, &e., is added.

It can be demonstrated that in the Western States, where coal can be mined for \$3 per 100 bushels, and ore at \$1 50 per ton, that pig iron can be smelted for \$12 per ton, and bar irou produced at \$35 to \$40 per ton; after adding to this commission, and carriage for a distance of 300

As one of the principal alterior object of the geological survey of the State will be to define the limit of the coal fields, and develope the rich mineral wealth lying adjacent to its confines, English iron can be delivered in the Western and since the reconnissance, which has been made, proved that the lower 1,000 feet of the coal measures and the circumscribing belt of unper plan to be pursued in the pro-ecution of the uletailed geological survey is to carry the work nt increase for the last few years, will not be over first around the confines of the coal fields, then fill the interior from the circumference on the same plan that has been followed in Union county

The most economical and expeditious plan would be to put an equal force on the western and ountry is a matter not only of State interest, but ward the survey simultaneously around the east ern and western margins of the two coal fields. D. D. HWEN, State Geologist.

By an act of Congress approved 3rd March, 1855, it is required that, from and after the 1st day of January, 1856, all letters between places in the United States, must be prepaid, either by postage stamps or stamped appellings. Persons mailing letters would do well to supply them-Notice is given, that owing to the expenses attending the refittings and additions to the Boxes for delivery that the rent will be raised to \$2 per year.

B. F. JOHNSON, P. M. Dec. 28, 1855-tf.

A GOOD second hand ROCKWAY will be sold on very reasonable terms. It can be seen and terms made known on application to W. P. LINK Jan. 61, 1856 ICh. W. M. T. W. P. LINK Jan. 92. Region of the Sea. For sale at Jan. 92. HUMPHREY EVANS. New Books.

It is well known that there is great economy in crusbing or grinding the keruels of all grain before feeding it stock, and that there is much nutriment in the color and the only reason at milisarranged to produce these desired results have at been more generally introduced among planters and

latthers, and ocon their complex arrangement and high cost.

In the Kentucky Corn mad Coh Mill, of which the above is an accurate engraving, we claim to have produced a nuachine at once efficient, substantial and cheap, while its arrangement is so simple that the most ordinary hand can adjust and operate it. This machine, unlike any other, is regulated by menns of a single set screw, which is easily moved by hand, and is applied directly under the centre of the mill.

Any one using these Mills will find a clear saving of one quartea of their corn over the old plan of feeding. We warrant these Millsto giveentire satisfaction. Purchasers may use them for thrity days and if not satisfied, can return them and get their money.

They will grind Corn and Coh as the as desired, at the following rate per hour, with one horse:

ollowing rate per hour, with one horse: No. 1, 4 to 5 hushels per hour. Weight 350 %. Price No. 1,4 to 5 hushels per hour. Weight 400 hs. Price 825 00.
No. 2, 6 to 8 bushels per hour. Weight 400 hs. Price 830 00. Adding freight from Louisville.
The above prices includes the complete Mill ready to hitch to without any further expense, and can be set in operation in five number time. For sale hy
E. L. SAMUEL,

DOXON & GRAHAM DOXON & GRAHAM
keepeverything, and persons wishing an outfit for house-keeping, call on us and find in our store-rooms almost every article uccessary for house-keeping, from a Rolling jin up to a singar curred Ham. Table ware, Spices, & c., & c., & c. Then they want FURNITURE. "Not calculating from the proceeds of profits," but from the fact that a complete outfit can be purchased at our house for house-keeping, relieves the purchaser from much trouble and many small bills, we have, for the accommodation of our customers, necently enlarged our furniture rooms, and can now, and will in future be able to offer inducements to all wishing to purchase—provided lowest figures be an inducement.

The Chain Pump,

Decidedly the cheapest and most desirable Pump ever invented, and warranted to perform well when put up by us. We are prepared to furnish Iron and Wood curbing, and Iron, Zink, and Wood Curbing at very low prices. Atmospheric and Suction Pump. This description of Pump is generally well known; sey perform satisfactorily in shallow wells or cisterns, at thoir flability to freeze renders them troublesome.

The Suction and Force Pump. A most excellent Pump, upout he same principles of the Atmospheric Pump, capable of lifting water birty-three feet, and then forcing it fifty or sixty feet, from a short leather hose; but still this pump is also liable to freeze and burst, unless the valve is opened by clevating the become account of the property of the property of the same account of the property of the property

Earthen Tubes. A new Invention for sewers and drains, costing only six cents per foot—casily put down and very durable; cer-tninly the best and cheapest drain over invented. A LARGE SUPPLY OF

Metalic Burial Cases

Metalic Burial Cases of all sizes, from twenty-two luches to seven feet long, ornamental and plain finish, covered with fine cloth and fringe, &c., silver mounted and bronzed.

Having first introduced these Cases in our city, proven by trial to be most admirably adapted for preserving the mortal remains, the decided preference given them over the old fashioned wooden box, the increased demand in the city, county, and adjoining counties has induced us to purchase a first rate HEARSE, which, togethor with any number of CARIAGES ordered, will attend all funeral occasions desired. Wo have also a large lot of Wooden Boves to enclose the Metalic Cases, which we will furnish at \$1 for small and \$3 for lurgest sizes, and in every lustance where we furnish Burial Casos, Boxes, or Hacks, we warrant the bills satisfactory, and no extention.

Cordage. Hemp, Manilla and Cotton Rope, Carpet Warn, and the best article of Cotton Yarns, of all sizes and numbers. Tar,

Mattrasses. Double, Single, Lounge, Trundle, and Crib stres. Hurr, Cotton and Shuck.

Axes Hunt's Douglass Axes, the hest article now in time: Hind Saws, Hatchets and Hammers. Nails.

> MORTIMORE'S RHEUMATIC COMPOUND.

Tills truly celebrated preparation, efficacious alike. I for each and every description of RIBETMATIC COMPLAINTS, is already too well known and esteemethroughout the United States, to require any lengthy no tice of its paramonnt virtues. It eradientes this hereto fore incurable and distressing disease from the system id stands unrivalled in the pharmacy of medicine

SUFFERERS THEMSELVES. SUFFERERS THEMSELVES, to procure from the agent in their vicinity, a lervalar and not only read the testlmony of those who have exportenced its invaluable curative powers, but to write to, or call upon, the convalescents, so that the statements may emanate from the Foundard flags—a consess which will satisfy the most incredulous, and one by which the reputation of the Rundow is certain of being sustained. Write also to the proprietors, who will accord every information, and furnish names of undoubted character from every section of the Union, numbering among them some of the obstemical them controlled the section of the remedy beyond the reach of doubt or mistrust.

REPRHEUMATIC COMPOUND AT is a Vegetable Extract, an Internal Remedy, prepared expressly for this one busease; and this it will cure in every form, either inflamulatory (Acute) or Chronic, and J. M. MILLS, Frankfort, Ky

THE GREAT ALTERATIVE, MORTIMORE'S BITTER CORDIAL

BLOOD PURIFIER. BLOOD PURIFIER.

This Invaluable remedy—for every description in Neavous Affections, and for diseases of the Liven and Kinners—has abtained a popularity wherever introduced, unprecedented in the history of any other medical preparation ever brought before the public. Many of our most Eminent Physicians have thoroughly tested its merits, and now prescribe it as the most effective Alterative and Hlood Purifier ever known.

Neuralgia, Pyspepsia, Pulpitation of the Heart, Night

Neuralgia, Dyspepsia, Palpitation of the Heart, Night sweats and Affections of the Lungs, will readily yield to ho influence of this unrivaled remedy. Physical Demangements or Irregularities especially with Fax alrestorducing debility and prostration of the system—may be at once obviated and removed by the use of the Bitter Cardial and Blood Purlüer, which is a vertable strough.

which is a regetable sprout, pleasant to take and perfect-y safe to be used in any state of health, even by the most fellcato female or child. Price one dollar per boltle.
